After 20 years of teaching I can say that Kyle & Jon's teachings have been what I've been looking for all of my life. I wish I could travel back in time to start my career over. I plan to spend the rest of my career putting into practice what I've learned thus far.

My biggest takeaway from Kyle & Jon's online PD programs is the renewed belief in my own teaching abilities! Before their influence, I'd researched the best ways for students to learn but had a hard time putting those ideas into practice. Their online course helped me see the connections among the best practices out there while showing me how to implement them in my classroom. Thanks Jon and Kyle for the countless hours you have put into making this happen.
